

# SANS Comes to Charleston!

## May 16th

### Security 504: Hacker Techniques, Exploits, & Incident Handling

By helping you understand attackers' tactics and strategies in detail, giving you hands-on experience in finding vulnerabilities and discovering intrusions, and equipping you with a comprehensive incident handling plan, the in-depth information in this course helps you turn the tables on computer attackers. This course addresses the latest cutting-edge insidious attack vectors and the "oldie-but-goodie" attacks that are still so prevalent, and everything in between. Instead of merely teaching a few hack attack tricks, this course includes a time-tested, step-by-step process for responding to computer incidents; a detailed description of how attackers undermine systems so you can prepare, detect, and respond to them; and a hands-on workshop for discovering holes before the bad guys do. Additionally, the course explores the legal issues associated with responding to computer attacks, including employee monitoring, working with law enforcement, and handling evidence.

**This course prepares for the GCIH certification  
GCIH satisfies DOD 8570 CND Incident Handler requirements!**

**Register Today!**

**To Register or Get Additional Information on this course:**

Visit the SANS website at: <http://www.sans.org/mentor/> or contact Chris Sanders at [chris@chrissanders.org](mailto:chris@chrissanders.org).

**Course Location:**

Marriott Courtyard Charleston  
2415 Mall Drive  
North Charleston, SC 29406

**Group Discounts:**

SANS Mentor Program is pleased to offer two (2) or more Students who work at the same organization, a Group Discount tuition fee. To obtain the Group Discount fee and Registration Code offered for this course, contact [mentor@sans.org](mailto:mentor@sans.org) PRIOR to registering.

Students study SANS Hacker Techniques, Exploits, & Incident Handling course books at their own pace. Each week, students meet with SANS Local Mentor, who will lead class discussions, provide hands-on demonstrations, point out the most salient features, and answer questions. The Mentor's goal is to help students grasp the more difficult material, master the exercises, and prepare them for GCIH certification.

**SANS Mentor Program**

Mentor is SANS' program for learning our courseware in ten-weekly classroom sessions right in your home town. Mentor gives you time to absorb and master the same material commonly taught at SANS six-day conferences, with the guidance of a trained network security professional. For more information on the SANS Mentor program, go to <http://www.sans.org/mentor/about.php>

SANS makes every effort to help you obtain certification.

**Mentor bio:**

Chris Sanders is a network security researcher, consultant, and author based in Charleston, SC.

Chris serves as a government defense contractor where he interfaces with various federal entities in an effort to provide a more secure cyber posture in defense networks. His book Practical Packet Analysis is widely respected as one of the best practical use books on its topic and has sold several thousand copies internationally. Along with this, Chris has written and co-written hundreds of articles on network security.

Chris has a bachelors degree from Murray State University and currently holds several industry certifications including being recognized with SANS GCIH, GCIA, GSEC, GPEN, and GREM distinctions.
